

# Required Web Downloads

- Java Runtime Environment (JDK): Version 8 or newer
  - Required in order to use Eclipse IDE.
- Eclipse IDE for Java Developers: Version Mars or newer
  - Provides the environment to accommodate the Flowable plug-in, which is used to create the workflows.
- Flowable Eclipse Designer Plugin
  - Provides a list of diagram elements and a drop-and-drag method for developing workflows within Eclipse IDE. The resulting files are fully compatible with Collibra Platform.
- Groovy-Eclipse: Scroll down to the Update Sites in release notes.
  - Adds support for Groovy syntax highlight and auto-completion in Eclipse.
  - Install Groovy-Eclipse

# Required Web Downloads

- [Java API Library: Version 2 \(dgc-core-XXXX.XX.X-XX-apiv2.jar file\)](#)
  - Allows you to reference the Collibra Java API Library within a Groovy script while scripting within the Groovy-Eclipse Plug-in. If you prefer using your own editor to write the Groovy script, you can skip this step and create a new Groovy script file inside your editor.
- A text editor (Sublime, Notepad ++, TextWrangler, etc.)
  - Allows you to edit code out of Eclipse more easily.
