

Required Web Downloads

- Miniconda
 - Required to install pip.
- Jupyter Labs
 - Install pip with the command at the Terminal (Mac/Linux) or Anaconda Prompt (Windows):
`conda install pip`
 - To install Jupyter Labs, use the command
`pip install jupyterlab`
 - This is used to run with an external python application that creates and searches for resources within Colibra using our Import and Search REST APIs.
 - To run the notebook, use the command:
`jupyter notebook`
- A text editor (Sublime, Notepad ++, TextWrangler, etc.)
 - Allows you to edit code out of Eclipse more easily.
